R&D ADVANCES  
PATENT BOX  
GRANT FUNDING  
CAPITAL ALLOWANCES

With a 30+ year heritage and team of 50 committed experts and advisers in the UK, last year we recovered £31.5M in innovation tax benefits for British Businesses, including some of the world's best-known brands.

Our aim is to help clients accelerate and fund their innovations. We operate on the entire value chain of innovation through our multidisciplinary team of scientific and technical consultants, optimising tax relief and grant funding to support your business growth plan.

It pays to choose a provider with a proven track record – recommended by AILU – whose unique combination of highly qualified and experienced staff with proven methodologies consistently deliver great results for clients.

...Our processes are simple and straightforward with the emphasis upon ABGI doing the work for you - making this a pain free process.

Upon referral from AILU, I will appraise your innovation activity and feedback regarding the value of reliefs and grants available, helping to prioritise all available opportunities.

In the case of R&D Tax Relief, we will then select an Innovation Funding Consultant closely matched to your business, client base and project activity.

The consultant will ensure all technical and financial information is captured to build the R&D Tax Relief claims and provide drafts for sign off. ABGI then submit the claims to HMRC with tax benefit typically paid directly to you in 6-8 weeks.

We have completed over 4,500 claims for R&D Tax Relief, all of our work is fully defended against any HMRC Enquiry, and our fees are 'no-win-no-fee' - only payable when you have actually received the tax benefit.

I look forward to meeting you.

James Cameron | Innovation Funding Specialist | ABGI-UK

**ABGI is offering a 10% discount on fees to AILU Members and encourages a 'health check' regarding opportunities across Innovation Funding, even if you are already claiming for R&D Tax Relief.**

The ability to claim R&D associated with Subcontracting has recently changed, and HMRC has increased rigour in identifying claim errors, raising the number of enquiries across the board. An upcoming Finance Bill will implement changes in claiming for R&D Tax Relief, such as: new allowable expenses in Cloud & Data costs, overseas subcontracting being ruled out, claims being submitted digitally with a full technical narrative - including sign off by a director, and disclosure of the adviser that compiled the claim, together with pre-submission notification to HMRC.

**ABGI will support AILU members in keeping ahead of this change, so please contact Antony Beak to arrange a further discussion.**
